FAQ

LOCK JAW
Ladder Grip

Question

Why use Lock Jaw?

Answer

Climbing ladders are extremely dangerous with hundreds of thousands of people injured from ladder falls.

There are also legal requirements in most countries to secure a ladder.

In Australia:

- Work Health and Safety Act 2011 - 306L Work on a ladder
- Work Health and Safety Regulation 2011
- Managing the risk of falls at workplaces Code of Practice 2021 -WHSQ

Question

What is the widest ladder rail that the product will fit?

Answer

The Lock Jaw Ladder Grip can accommodate ladder rails up to approximately 50mm wide.

Question

Do I need to use one or two Lock Jaw Ladder Grips?

Answer

The product is designed to work as a single unit. We find that persons accessing multi-storey buildings or climbing regularly often opt to use two units (one on each side of the ladder). Two units offer greater stability.

FAQ

LOCK JAW
Ladder Grip

Question

What types of guttering can the device be used on?

Answer

The Lock Jaw Ladder Grip can be used on the majority of guttering, including both traditional and box guttering. Put simply, if you can place the jaws of the unit over the edge of your guttering the device will work.

Question

How do I carry the device up the ladder?

Answer

The Lock Jaw Ladder Grip is supplied with a carabiner which can be clipped onto your belt loop or work belt. So you can maintain 3 points of contact which is best practice when climbing a ladder.

Question

Where was the Lock Jaw Ladder Grip invented?

Answer

Lock Jaw Ladder Grip was co-invented by Craig and his father Robert Charlton in 2009 after experiencing an injury whilst working on a ladder. It was invented in Australia and there have been countless hours spent on engineering and testing to perfect the design

Question

Is the Lock Jaw Ladder Grip patented?

Answer

Yes. The device holds both Australian and international patents in addition to trademarks.

Ladder Grip

Question

Who purchases the Lock Jaw Ladder Grip?

Answer

We sell to a broad range of customers ranging from home handypersons, builders, plumbers, roofers solar installers and electricity companies to name a few. The product will suit anyone who needs to access a roof using a ladder that will be rested on guttering.

Question

What is the device made of?

Answer

The Lock Jaw Ladder Grip is made from high grade Nylon plastic and metal components. The product is durable and long lasting and will last many years.

Question

Will this work on a Xtend & Climb Ladder?

Answer

Yes, this is the same ladder as the telesteps ladder and as long as you adjust the Lockjaw properly, it will work on the Extend & Climb. It won't be as snug fitting as a rectangular style ladder would be but would certainly add stability.

Question

Does this work on K style gutters?
Looks like it would leave a dent.

Answer

Yes. it will work with the various adjustments. There are rubber grips to protect the ladder.

FAQ

LOCK JAW
Ladder Grip

Question

Does package include one or two units?

Answer

We do sell in single and dual packs. Only one unit is required to make the ladder secure and not slide, although two could be used.

Question

Does it work on all gutters?

Answer

It works on most metal gutters. The gutter needs to have a lip for the jaws to secure under. We only recommend Lock Jaw to be used if you are prepared to rest a ladder on the gutter.

Question

Is this product compatible with a gutter installed with a leaf guard?

Answer

Lock Jaw Ladder Grip needs to clamp onto the inside of the gutter. If the leaf guard can be lifted up (some plastic guards can be lifted), the Lock Jaw can be applied. If however it is metal guard that is fixed, the Lock Jaw Ladder Grip cannot be used.

Question

Is there an attachment to work with the Xtend ladders? It seems the pole is too small for the arm to grab.

Answer

Lock Jaw Ladder Grip works on Xtend ladders. We have customers that use the telescopic ladders and it works very well. The side bar extends and contracts and works on almost all ladders on the market.

FAQ

LOCK JAW
Ladder Grip

Question

Does it stop the gutter getting crushed?

Answer

There are rubber pads on the clamp mechanism to prevent scratching. Once the Lock Jaw is installed the ladder won't move

Question

Where can I purchase the Lock Jaw Ladder Grip?

Answer

We sell worldwide via our website. Go to our Checkout page to find our pricing and any duty and taxes that apply. There are distributors in countries all over the world.

Question

Would not this pull off the gutter?

Answer

We only recommend using Lock Jaw if you are prepared to rest your ladder on the gutter. If the gutter is unstable then we wouldn't recommend putting any equipment on it

Question

Do I need two hands to set up the device?

Answer

There is a carabiner that clips to a belt and Lock Jaw can be applied with one hand. It locks on in 5 seconds and can be removed in seconds.

FAQ

LOCK JAW
Ladder Grip

Question

Does it meet OSHA standards?

Answer

It meets the general requirements of ANSI-ASC A14.8-2013. OSHA recommends securing your ladder

Question

What are the standards Lock Jaw meets?

Answer

There aren't standards in Australia, Europe, Canada and most countries internationally. We have had the product tested including static load testing and it has been used successfully since 2009. See our reviews from our customers in 10 countries.

FAQ

LOCK JAW
Ladder Grip

Question

What protects the gutter from you bending and scratching it from your ladder?

Answer

There are rubber pads on the lock Jaw. It can also be used with a gutter protector. The Lock Jaw holds the ladder very tightly to the gutter and reduces movement hence scratching.

Question

Will it work in wood gutters?

Answer

It won't work due to the thickness of the gutter
